

METAL SOLUTIONS FOR RESIDENTIAL AND COMMERCIAL BUILDINGS

PROJECT-BASED METAL STRUCTURES

PRODUCTION AND SUPPLY OF METAL ELEMENTS

FOR RESIDENTIAL, COMMERCIAL, AND INDUSTRIAL BUILDINGS

YOUR METAL PARTNER FOR THE ENTIRE BUILDING

KOLUKS provides complete metal solutions for residential, commercial, and industrial buildings. We work project-based, with serial production and consistent quality.

OUR ROLE IN THE CONSTRUCTION PROCESS

- One supplier for all metal items within the building
 - Production based on project drawings and technical documentation
 - Serial manufacturing for buildings and larger developments
 - Ready for installation, with fast delivery
 - Flexibility to adapt to investor or contractor requirements
-

WHO WE WORK WITH

- Construction companies and investors
- HVAC and electrical contractors
- Public and private projects

PRODUCT SOLUTIONS FOR BUILDING PROJECTS

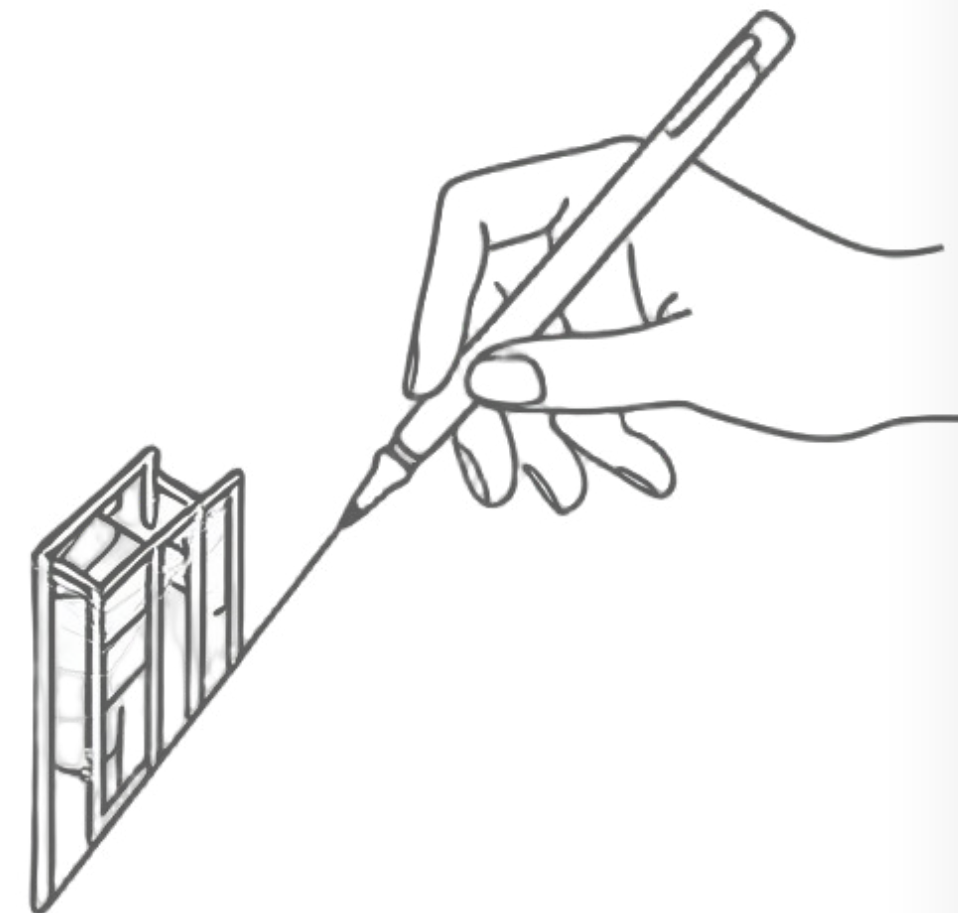

Our production includes metal elements that represent standard and essential components in the construction of residential, commercial, and industrial buildings.

KOLUKS provides complete support for metal positions within a building, with a focus on functionality, compliance, and continuity in execution.

PRODUCT GROUPS

- Metal railings and parapets for stairs, balconies, and facades
- External and courtyard metal fences and gates
- Supports and mounting elements for HVAC systems
- Cable trays and supports for electrical installations
- Mailboxes and equipment for shared spaces
- Fire hose cabinets and metal safety boxes

These products are intended for use across entire buildings, complexes, and technical facilities as part of one coordinated metal solution.

METAL STAIR RAILINGS

Production of metal railings for internal and external stairs, intended for residential, commercial, and industrial buildings.

Railings can be produced in different forms and styles, including modern, industrial, or classic designs. Depending on the project and technical requirements, various metals can be used, including steel and aluminum, with powder coating or suitable anti-corrosion protection.

- Interior and exterior stair railings
- Design according to the architectural concept, modern, industrial, or classic
- Steel or aluminum, powder coated or galvanized for corrosion protection

Railings are adapted to the building and to the requirements of the investor or contractor.

BALCONY AND DECORATIVE METAL RAILINGS

Production of balcony and facade metal railings for residential and commercial buildings, manufactured according to project requirements.

Decorative panels are produced through laser cutting, allowing modern, classic, or fully custom designs according to the investor's request. These solutions can be adapted to the architectural language and visual identity of the building.

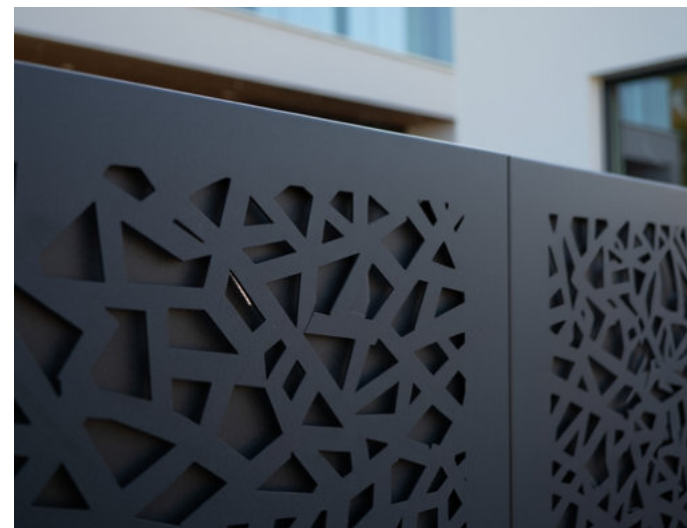

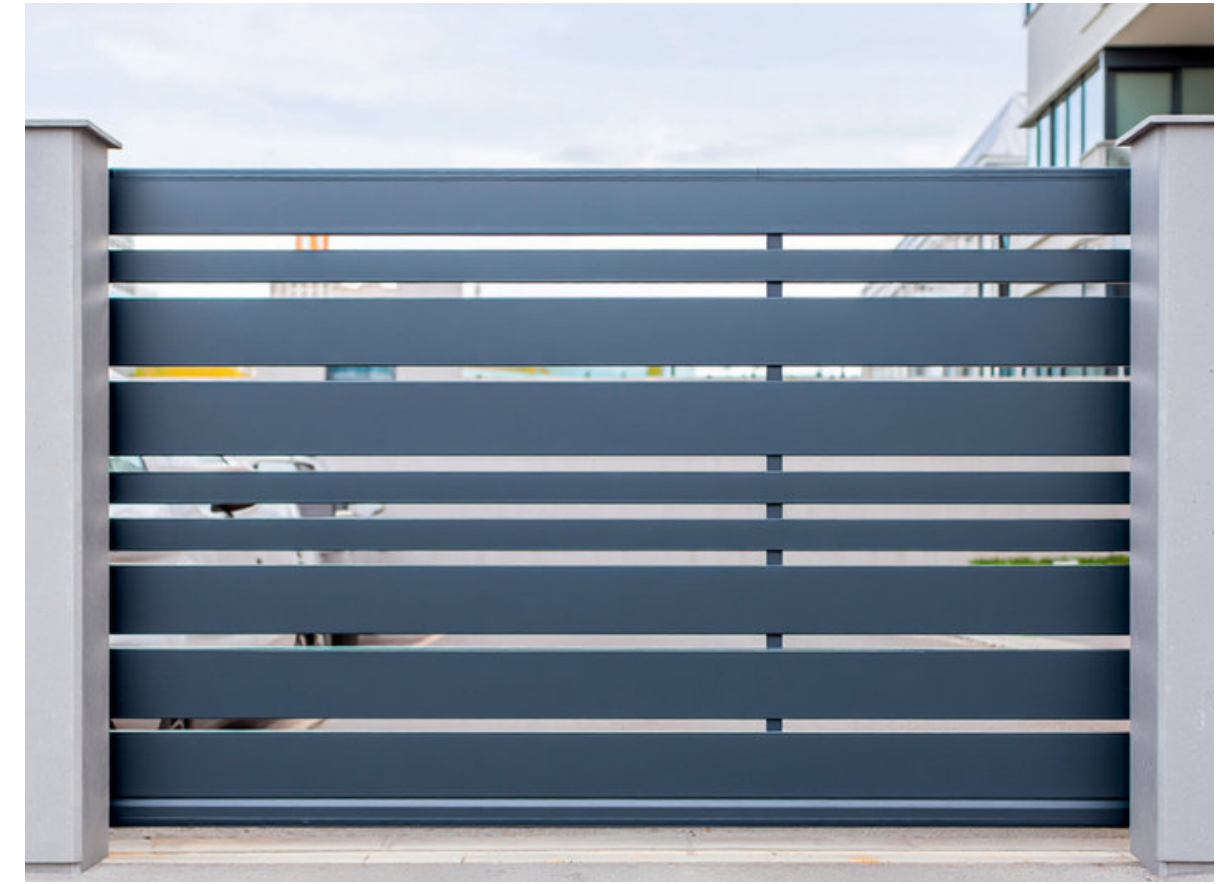

Production of facade cladding elements and protective metal flashings below windows, aligned with the facade concept.

- Balcony railings for residential buildings and complexes
- Decorative laser-cut sheet metal panels
- Repetitive facade design for a unified visual identity

Decorative panels are produced through laser cutting, allowing modern, classic, or fully custom designs according to the investor's request. These solutions can be adapted to the architectural language and visual identity of the building.

EXTERNAL AND COURTYARD METAL FENCES

Production of external and courtyard metal fencing for residential buildings, complexes, and industrial zones.

- Perimeter fences and entrance gates, swing or sliding
- Modern slats and decorative segments for complexes and courtyards
- Functional industrial fences for technical, service, and security zones

Depending on the application, we also produce functional industrial fencing systems intended for technical and security areas.

Fences are designed and manufactured in accordance with the architectural concept and the functional requirements of the building.

CANOPIES AND ENTRANCE METAL STRUCTURES

Metal canopies for entrances in residential, commercial, and industrial buildings.

Canopies are produced as practical structural solutions for protecting entrance areas, with clean lines and adaptation to the facade and intended use of the building.

We also manufacture additional sheet metal elements such as gutters, cladding, and finishing flashings, according to project requirements and building needs.

- Facade-mounted and cantilever metal canopies
- Modern and functional design with steel construction
- Suitable for entrances, industrial facilities, and service buildings

These solutions are designed for long-term use and easy application across different types of buildings.

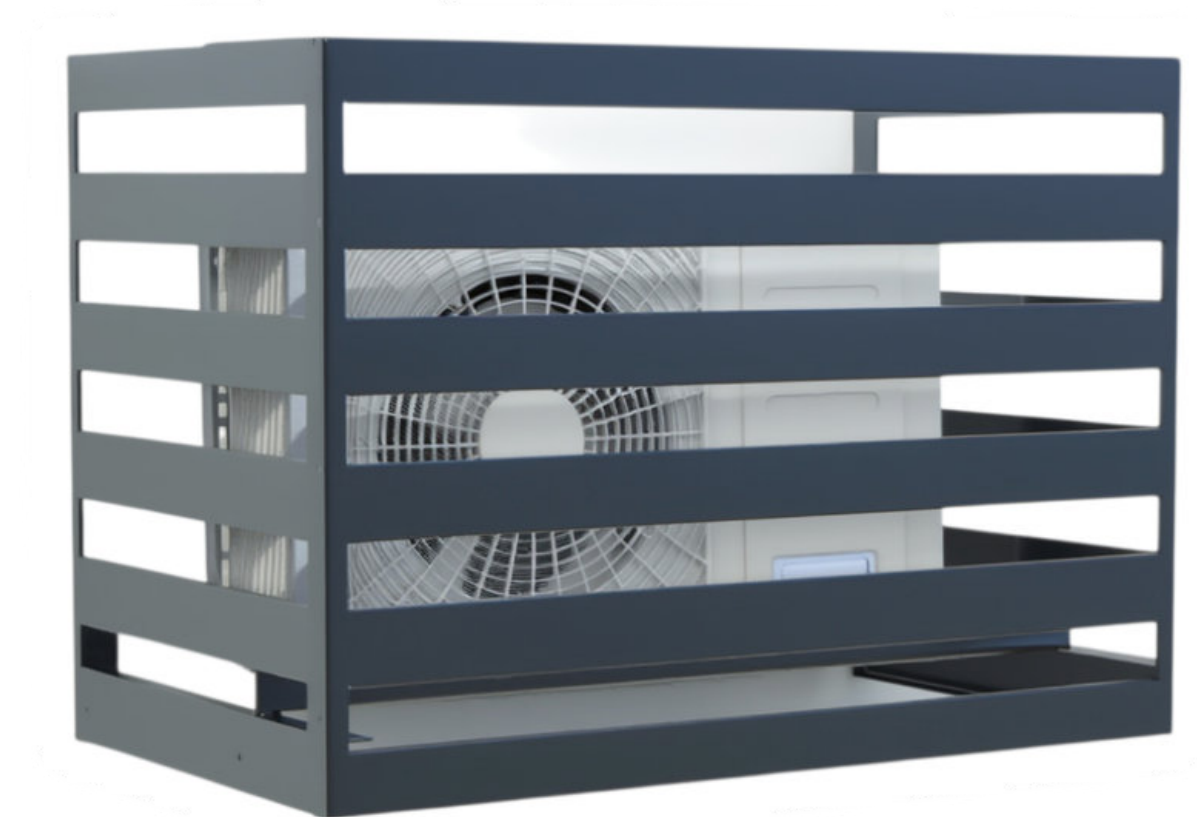

AIR CONDITIONER SUPPORT BRACKETS

Production of metal supports for outdoor air-conditioning units, intended for residential, commercial, and industrial buildings.

STANDARD DIMENSIONS (W × H)

	W	H
SMALL	400	400
LARGE	500	500
FACADE TYPE	600	500

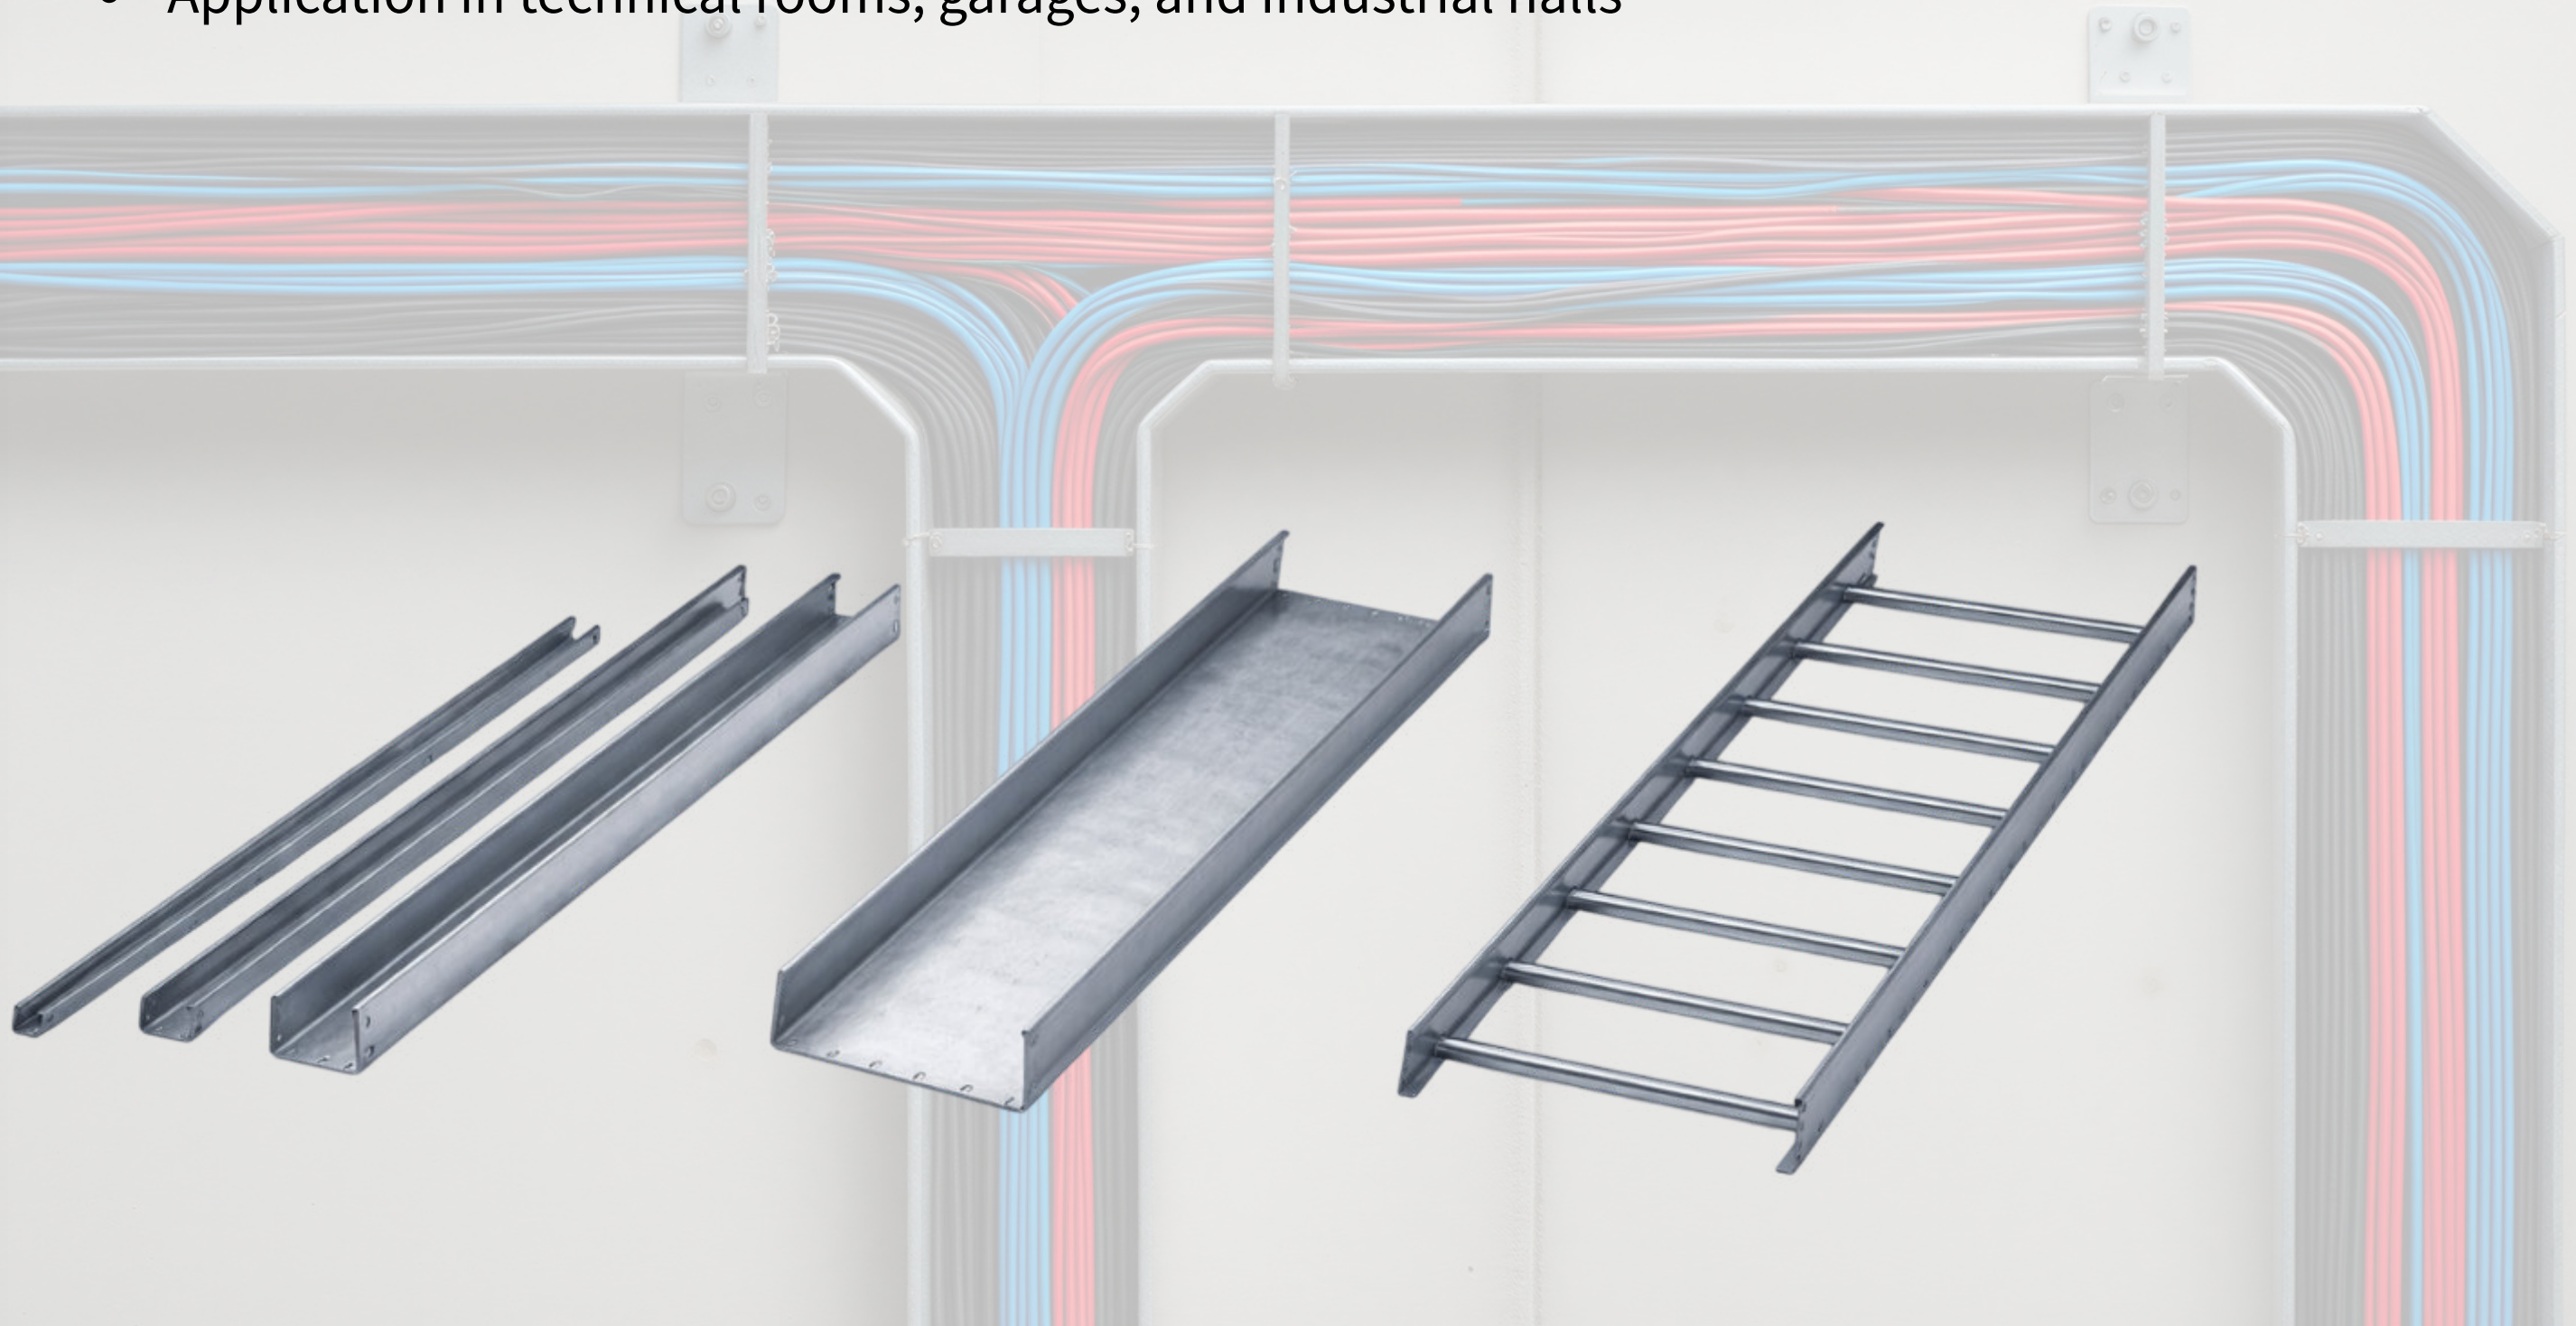

Protective metal enclosures and cages for outdoor AC units are also available for facade mounting, produced from tubing, mesh, or decorative laser-cut panels, with the purpose of providing protection and better visual integration into the facade.

Other support types and mounting solutions can also be produced according to specific project requirements.

CABLE TRAYS AND SUPPORTS

Metal systems for organizing and carrying electrical and installation cables in buildings and industrial environments.

- Cable trays for electrical and low-voltage installations
- Supports and brackets for wall and ceiling mounting
- Application in technical rooms, garages, and industrial halls

The systems provide a neat, safe, and clearly organized installation.

MAILBOXES AND EQUIPMENT FOR RESIDENTIAL BUILDINGS

Metal mailbox systems and related elements intended for shared areas in residential buildings.

- System mailbox units for apartment buildings
- Single-sided and double-sided configurations
- Suitable for installation in entrance areas and common spaces

If you already have an idea or a reference from an existing solution, contact us for consultation and implementation. Mailbox systems can be assembled in the desired quantity and layout, with options for built-in installation or external wall mounting.

The solutions are adapted according to the number of apartments and the architectural concept of the building.

FIRE HOSE CABINETS AND MEDICAL METAL BOXES

Metal cabinets and boxes for safety equipment, intended for residential, commercial, and industrial buildings.

- Fire hose cabinets for indoor and outdoor installation
- Metal medical boxes for shared and work areas
- Production according to regulations and building requirements

Metal cabinets and boxes for safety equipment are produced for use in residential, commercial, and industrial environments.

QUALITY AND STANDARDS

KOLUKS production follows a controlled process and consistent quality, intended for use in residential, commercial, and industrial buildings.

Metal structures and elements are manufactured in accordance with applicable technical regulations and relevant European standards, including Eurocode standards for steel structures.

Material control and workmanship ensure safety, durability, and long-term performance in real operating conditions.

OUR WAY OF WORKING

FROM IDEA TO FINISHED PRODUCT

- Receiving a project, concept, or technical requirement
- Consultation and alignment with the needs of the building
- Production in our own facility
- Preparation for delivery and installation

We work flexibly, project-based, with clear communication and reliable execution.

If you have a project, a requirement, or need a quotation for metal solutions, feel free to contact us. Our team is available for consultation and cooperation with construction companies, investors, and contractors.
