Personal Collaboration

Short, direct communication for a better understanding of your needs and expectations.

Professional Guidance

We help you choose the most suitable solution through clear recommendations and practical examples.

On-Site Installation

Professional installation and final adjustment for safe and long-lasting use.

Organized Delivery

Safe and timely delivery directly to your location or warehouse.

STANDARD METAL CABINETS

Standard metal cabinets are a practical and secure solution for organized storage of personal and work equipment.

Made of quality steel with a stable structure, these cabinets are intended for everyday use in industrial, business, and public spaces. They are available in several configurations, with the option to choose the number of doors and additional equipment according to user needs.

Features:

- Solid metal construction
- Ventilation openings on the doors
- Key locking
- Available in single-, double-, and triple-door modules
- Various colors and finishes

PRODUCT RANGE

LOCKER CABINET WITH Z DOORS

Locker cabinets with Z doors are a practical solution where space must be used efficiently without sacrificing functionality. The door shape gives each user enough room for personal and work clothing while keeping the cabinet compact.

This type is especially suitable for factories, production facilities, sports venues, and public institutions with many users.

Features

- Z-door layout for optimal use of space
- Separate compartment for each user
- Metal construction for daily use
- Ventilation openings for better airflow
- Practical layout for work and personal clothing

Optional Extras

- Various lock types
- Door numbering or name labels
- Color selection to match the facility
- Modular combinations available

LOCKER CABINET WITH SHORT DOORS

This locker cabinet with short doors is designed for areas where fast, practical use and clear internal organization are required.

Short doors provide easier access to each compartment and better visibility, making this model suitable for facilities with many users and frequent use. The cabinet features a stable metal structure designed for everyday working conditions.

Standard Equipment

- Steel cabinet construction
- Ventilation openings on the doors
- Individual key locking
- Hooks for hanging clothes
- Stable base with legs

Optional Extras

- Different door colors
- Additional internal shelf
- Alternative lock types
- Identification labels

Applications

Production plants, warehouses, sports facilities, public, and work spaces.

METAL CABINETS

PRODUCT RANGE

SPACE-OPTIMIZED LOCKER CABINETS

These locker cabinets are intended for spaces that require clear separation and individual access for a larger number of users. Thanks to the small, separate compartments, each user gets a dedicated area for personal items and work equipment.

The rational design enables efficient use of space and easy organization, making them ideal for factories, work environments, sports facilities, and public institutions with intensive use.

Advantages

- Clear individual division per user
- Better organization of personal items
- Practical for high-user environments
- Suitable for everyday intensive use

LOCKER CABINETS WITH BENCH AND EXTENDED FUNCTIONALITY

A practical solution for everyday use in changing rooms, production facilities, and public buildings. The combination of locker space and bench enables better organization and more efficient use of space, with options to adapt the unit to user needs

Key Benefits

- Practical for limited space
- Clear organization of clothing, footwear, and equipment
- Metal construction suitable for industrial use
- Can be upgraded with additional options
- Combines function, comfort, and durability

Optional Extras

- Top cover
- Lower storage cabinet
- Bench in various versions
- Different lock types and colors

+ SLOPED TOP OPTION

+ STAINLESS-STEEL BASE OPTION

Lower storage units for shoes and personal equipment

Bench as a functional element for everyday use

PRODUCT RANGE

CABINETS WITH SMALL COMPARTMENTS FOR VALUABLES

These cabinets are intended for safe and organized storage of personal belongings in spaces with a higher frequency of users. Thanks to multiple individual compartments, each user gets a clearly defined personal space.

The compact design allows rational use of space and easy integration into different types of facilities.

Key Benefits

- Individual compartments for personal items
- Clear organization and fast access
- Compact solution for limited space
- Suitable for factories, public, and commercial buildings

Optional Extras

- Choice of lock type
- Number or name labeling
- Color selection
- Floor-standing or wall-mounted version

A Practical Solution for Every Space

The low-profile design makes maximum use of space, especially under windows and along walls, creating a clean and functional layout.

PRODUCT RANGE

VALUABLES STORAGE CABINETS

Designed for safe and organized storage of personal belongings in spaces with frequent users. Individual compartments provide clearly defined personal storage, while the compact design allows easy placement in offices, industrial environments, and public buildings.

Standard Equipment

- Clearly organized individual compartments
- Security lock with two keys
- Perforated doors for continuous ventilation
- Protective powder-coated finish suitable for daily use

Optional Extras

- Different security lock options
- Number or name labeling
- Doors in multiple colors
- Legs or floor-mounted base
- Can be combined with other cabinets from the system

PRODUCT RANGE

MAILBOXES

A practical solution for organized and secure mail collection and distribution in residential and commercial buildings. The modular design allows easy combination and adjustment according to the number of users, with clearly marked compartments for quick identification. Metal construction and secure locks ensure long-term use and content protection.

WALL-MOUNTED LOCK BOXES FOR VALUABLES

A practical and compact solution for secure storage of personal items and valuables. Wall mounting enables full use of available space, with horizontal or vertical positioning depending on the facility layout. Ideal for high-traffic areas where quick access and clear organization are needed.

METAL CABINETS

PRODUCT RANGE

GUN CABINETS

Metal gun cabinets are designed for safe and organized storage of firearms in hunting associations, security agencies, institutions, and private settings. They are made of quality steel with electrostatic powder coating for durability and long-term protection.

Each cabinet is equipped with a three-point locking system and a functional interior layout, including padded holders and a separate lockable compartment for ammunition or equipment.

Different models are available, with options to adjust dimensions, capacity, interior layout, and color according to client requirements

TECHNICAL SPECIFICATIONS

Material:

Steel with electrostatic powder coating

Locking system:

Three-point locking with key

Capacity:

Up to 4 or up to 16 rifles, depending on the model

Interior:

- Lockable internal compartment
- Holders with soft protective lining

Standard Dimensions

- 1300 × 900 × 400 mm
- 1560 × 450 × 400 mm
- 1900 × 450 × 400 mm

Color:

- Custom RAL color on request

COMBINED LOCKER CABINETS

A practical solution for storing workwear, personal belongings, and additional equipment in one cabinet. The clearly divided interior enables functional organization and efficient use of space in offices, workshops, and industrial facilities.

CABINET FOR CHEMICALS AND HAZARDOUS MATERIALS

Designed for safe and organized storage of cleaning supplies, maintenance products, and related materials. The internal layout allows easy access and clear visibility, making it suitable for public, industrial, and commercial spaces where regular hygiene and maintenance are required.

HEAVY-DUTY TOOL CABINETS

Designed for safe storage of tools, equipment, and heavier materials. Built for intensive use in production plants, workshops, and industrial spaces where high load capacity and reliability are essential.

The internal layout enables stable storage of heavy items, with metal shelves designed for increased load. A solid lock and reinforced doors provide extra security and durability in demanding environments.

Features

- Metal construction for industrial use
- Heavy-duty metal shelves
- Shelf load capacity up to 130 kg
- Multi-point security locking
- Suitable for heavy tools and equipment
- Protective powder-coated finish

Additional Option

- Custom production available according to client requirements

Standard Dimensions

- Height: 1000 mm / 1980 mm
- Width: 1000 mm
- Depth: 420 mm

ARCHIVE CABINETS

Archive cabinets are a practical and functional solution for organized storage of documents, binders, and office supplies. The rational internal layout and adjustable shelves provide clear organization and easy access without taking unnecessary space.

They are suitable for offices, archives, administrative areas, and workspaces where secure and systematic document storage is required for everyday use. The solid metal construction ensures stability, durability, and safety.

Features

- Metal construction
- Security lock
- Fixed internal layout
- Protective surface finish
- Suitable for documentation and archive materials

Standard Dimensions

- Height: 1000 mm / 1800 mm
- Width: 600 mm / 800 mm / 1000 mm
- Depth: 400 mm

SLIDING DOOR CABINETS

A practical solution for spaces where efficient use of available area is important. Sliding doors provide easy access to the contents without requiring extra opening space, making these cabinets ideal for offices, archives, and work areas.

They offer clear organization of documents and materials, with a stable metal structure and a clean professional appearance that fits easily into different interiors.

Key Benefits

- Sliding doors save space
- Fast and easy access to contents
- Suitable for offices and archives
- Clean, functional, and professional design

Additional Option

- Custom production available according to client requirements

Standard Dimensions

- Height: 900 mm / 1200 mm / 1800 mm
- Width: 900 mm / 1200 mm / 1800 mm
- Depth: 400 mm

TOOL CABINETS WITH DRAWERS

These cabinets are designed for safe and organized storage of tools and equipment in workshops, production areas, and service spaces. The combination of shelves and drawers enables clear organization, easy access, and good visibility in everyday use.

The drawers are practical for smaller tools and accessories, while the shelves allow storage of larger items and equipment. The cabinets are built for stability and reliable use under heavier loads.

Features

- Combination of classic shelves and integrated drawers
- Smooth-running drawers for quick access
- Doors with wide opening angle
- Security lock
- Protective powder-coated finish for long-term use

Standard Dimensions

- Height: 1950 mm
- Width: 1000 mm
- Depth: 500 mm

Versions with different numbers of drawers are available

Additional Options

- Different internal layout configurations
- Custom production according to client requirements

SLOPED TOP FOR CABINETS

The sloped top prevents dust and objects from collecting above the cabinets. A practical solution for spaces with high hygiene standards and easy maintenance, especially in industrial and public facilities.

TOP STORAGE CABINET

An additional cabinet that increases storage capacity. Used as an upgrade above existing locker cabinets and provides better organization of personal items and equipment.

SLIDING DOORS

Sliding doors provide easy access without requiring extra opening space. An ideal solution for narrow rooms and corridors with intensive daily use.

INTEGRATED BENCH WITH LOCKER CABINETS

The bench adds comfort and practicality during changing. A functional addition that improves the use of space in changing rooms and shared areas.

WHY CHOOSE OUR METAL CABINETS

Our metal cabinets are designed as a reliable long-term solution for organized and secure storage in industrial, business, and public spaces. Their construction is based on precise engineering, with a focus on stability, functionality, and practical everyday use.

The cabinets are made from quality materials, with solid construction and a clean industrial design that ensures easy maintenance and long service life. These solutions are intended for spaces where order, safety, and durability are a priority.

CUSTOM CABINETS TAILORED TO YOUR NEEDS

In addition to standard models, we offer fully customized metal cabinets according to your dimensions and requirements. Production can be adjusted by:

- Height, width, and depth
- Number and layout of compartments
- Door type and locking system
- Additional functional elements

Our engineering team manages the full process, from technical concept to final production, ensuring a finished solution that fits your space and intended use.

Our cabinets are stable, secure, and durable, designed for professional environments.
